A terryfing journey into Lena's past and hometownVon WombatsbooksI finished reading "Skin Privilege" the day before yesterday. It didn't take me long to finish, but I still haven't stomached it:Whereas in "Indelible" the readers accompanied Sarah and Jeffrey on a journey into their past, "Skin Privilege" is mainly a journey into Lena's past and into her hometown Reece/Georgia: Lena hasn't been able to reach Hank in nearly two weeks and a neighbor of Hank's also called to let her know that Hank is in a bad condition. Therefore she grudgingly decides to drive to Reece and to check up on him.Once she arrives at Reece, she passes by a guy leaving Hank's bar. He bears a tattoo with a read swastika. She finds Hank indeed in a very bad condition indeed - he is using again. In his drug stupor Hank tells Lena that the guy with the swastika tattoo killed her mother..... Lena, an already very troubled person, suddenly has to question her past, her involvement with white supremacist Ethan Green and whether everything she has been told has been a lie. Hardheaded and curios to the bone, she starts nosing around, encounters really dangerous people and is in extreme danger again. To top things off she is suddenly a murder suspect and goes into hiding...Sara Jeffrey have been on an adoption agency's waiting list for several months, besides Sara is in the middle of a malpractice suit and on a down low as Jeffrey asks her to accompany him to Reece. They find out that some *very* shady things are going on in Reece. Lena keeps calling and telling them to leave ASAP, because Reece is too darn dangerous for them..."Skin Privilege" has Slaughter's trademark graphic descriptions of brutality. To me it has been the most thrilling and intense book in the Grant-County series yet. It is chilling to the bone, horrible and very sad. It sort of draws you in. You can't stop because you are terrified for the main characters - you just have to keep on reading to know the outcome.Result: Although "Skin Privilege" is like a severe punch to the gut (you will know why after having finished reading), is worth every single cent! If I were you, I wouldn't waste a single day and order it N-O-W! I can't wait to get my hands on the follow-up, which probably won't be out before another two years' time, however.Do yourselves a favor though: Please do not read the letter Slaughter mentions in her acknowledgements, before you have finished reading the book. Besides containing *several* major spoilers, reading her letter on her webpage is like yet another severe punch to the gut.12 von 13 Kunden fanden die folgende Rezension hilfreich. The Grant County novels, featuring pediatrician/medical examiner Sara Linton, her police chief husband, Jeffrey Tolliver, and Detective Lena Adams, combine suspenseful plots, gritty social realism, and graphic forensic detail. Here Lena returns to the poverty-stricken rural backwater where she was raised to check on her uncle Hank, the taciturn reformed junkie who raised her after her mother died. What she finds is a town decimated by methamphetamine addiction (including her long sober uncle), with the drug dealing controlled by skinheads and abetted by a corrupt sheriff's department. When she is forced to watch as her former childhood friend and neighbor, who has long battled addiction, is set on fire, she shuts down, convinced that her best recourse is to keep her mouth shut even as the local sheriff tries to get her to talk. That's when Jeffrey gets the call that his detective has been arrested. He and Sara, who is drained from fighting a grueling medical malpractice suit, are immediately drawn into the investigation, which leads to surprising revelations about some of the town's most upstanding citizens. In addition, Slaughter throws in a shocker of an ending that has serious implications for the future of the series. Slaughter's latest page-turner offers both wrenching emotional highs and lows and a gripping plot, but what gives it emotional heft is its unwavering focus on the grim social ills of the rural South.
