Von Kimberly Raye : Midnight Kisses (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Midnight Kisses (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen1 von 1 Kunden fanden die folgende Rezension hilfreich. EnjoyableVon Ein KundeI loved this concept, the hero is going incognito at a toy laboratory as super geek Marvin until he can clear his name; there he meets Josie - superintelligent and on a manhunt (she even created a list of Ten Commandments that her future husband must have). Josie wants to marry or be engaged before she turns 35 (in a few months). She is suppose to meet her friend's cousin (an exotic dancer) and winds up meeting Zorro (aka Matt the real

persona of Marvin - handsome, sexy and not at all a geek). I love books that can make me laugh and feel good and this is definitely one of them. I loved the discussion when they are designing their new invention to take to the science expo. Great enjoyable, book that makes you smile.0 von 0 Kunden fanden die folgende Rezension hilfreich. A fine, light-hearted readVon Suzanne B. KellyI bought this book because I like the premise that scientists can fall in love, too . While the hero and heroine were, indeed, bona-fide lab-coat-wearing scientist-types, don't read this book expecting to learn something new about artificial intelligence or robotics--or even plastics, for that matter. Our intrepid couple are as reality-based as the absent-minded professor. That aside, the story was cute, with the misconceptions (of otherwise very clever people) ripped away in a satisfying manner. The only thing I found a bit icky was a character being massaged and otherwise 'serviced' by a robot. Granted, this was only mentioned in passing (sorry, no interesting salacious details) but I still felt some moral twinges. If it's a robot, is it sexual harassment? Is it fair to create artificial life for use as a toy? Do androids dream of electric sheep?0 von 0 Kunden fanden die folgende Rezension hilfreich. Love and laughter at its best!Von Barks Book NonsenseIf you're looking for a genuinely amusing character driven read you won't want to miss this one! The plot is pure fun and the characters are lovable. The sensual tension is intense and the romance develops at a believable pace. This one ranks right up there with Dara Joy's HIGH ENERGY, only it has a much smarter heroine. If you're in the mood for a fun, sexy read you can't go wrong with this one. It's the perfect book to settle in with after a long stressful day. END

KurzbeschreibungMaking Mr. Right Smooth, sensual, fantastic skin that begged to be tasted--Josephine Farrington had just re-invented it. The new plastic was great for making a man. Tired of the pushy jerks that courted her, Josie could now design the bronze-skinned, hard-muscled exterior of a robo-hunk that could fulfill all her deepest fantasies. And she knew just the man to build the body. Matthew Taylor had never had trouble erecting anything, and the handsome scientist knew that Josie's robot was something he could create. But the beautiful biochemist deserved better than the cold devotion of a machine; she needed the fiery embrace of a real man. In an instant, Matt knew his course; by day he vowed to build her model of masculine perfection--by night he swore to be the real thing.KurzbeschreibungMaking Mr. Right Smooth, sensual, fantastic skin that begged to be tasted--Josephine Farrington had just re-invented it. The new plastic was great for making a man. Tired of the pushy jerks that courted her, Josie could now design the bronze-skinned, hard-muscled exterior of a robo-hunk that could fulfill all her deepest fantasies. And she knew just the man to build the body. Matthew Taylor had never had trouble erecting anything, and the handsome scientist knew that Josie's robot was something he could create. But the beautiful biochemist deserved better than the cold devotion of a machine; she needed the fiery embrace of a real man. In an instant, Matt knew his course; by day he vowed to build her model of masculine perfection--by night he swore to be the real thing.Synopsis Josephine Farrington wants to build the perfect man, a robot that would fulfil her every desire, but the man she hires to do the job, Matthew Taylor, seems better equipped for the job than a machine. Original.
