Von Douglas E. Richards : Mind's Eye (Nick Hall Book 1) (English Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Mind's Eye (Nick Hall Book 1) (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen2 von 2 Kunden fanden die folgende Rezension hilfreich. Klgllicher Terminator / Die Hard / Superman / Dr Kimble auf der Flucht-VerschnittVon dieleseratzAufgrund der vielen euphorischen Rezensionen habe ich mir diesen Thriller gekauft und hoffte auf spannende - und vor allem - originelle Unterhaltung, da mir der Autor bisher unbekannt war.Aber leider leider: Das Buch begann sehr spannend, wurde aber schon nach wenigen Seiten ein einziges Verfolgungs-/Katz-und-Maus-Spiel. Und diese Verfolgungsjagden

langweilten schnell, denn wir haben es ja schließlich mit einem Superhelden zu tun. Was soll das schief gehen? Das Buch zog und zog sich - nix war er mit einem spannenden, nachvollziehbaren und logisch aufgebauten, intelligenten Science-Fiction mit wissenschaftlichem Fundament la Crichton, Eschbach, Olsberg...Fazit: Eine totale Enttäuschung, zwar gut geschrieben, aber keinerlei Originalität oder Nachhaltigkeit: Lesen, zuklappen, vergessen! 1 von 1 Kunden fanden die folgende Rezension hilfreich. Unterhaltsam aber mit Längen Von SlashxStory: Der Protagonist erwacht in einem Milcontainer, ohne Gedächtnis, dafür mit jeder Menge Verfolger auf seinen Fersen, die ihm nach dem Leben trachten. Schon bald merkt er, dass er besondere neue Fähigkeiten hat, die ihm im Überlebenskampf sehr zugute kommen. Bewertung: Die Geschichte startet sehr spannend und rasant. Richards kann die Intensität jedoch leider nur im ersten Drittel des Buches halten, danach kommen einige Längen, insbesondere philosophisch angehauchte Diskussionen der verschiedenen Charaktere, die die Handlung nicht sonderlich voran bringen. Auch der eingestreute Humor ist sehr trivial und selten wirklich amüsant. Die "Auflösung" geht ziemlich klischeehaft. Trotzdem: die Ideen des Buchs sind erfrischend und interessant, so dass eine Leseempfehlung an Thriller-Fans ausgesprochen werden kann. Das Buch ist darüber hinaus Bestandteil der Kindle-Leihbibliothek, so dass es kostenlos ausgeliehen werden kann. 0 von 0 Kunden fanden die folgende Rezension hilfreich. Unterhaltsam Von Michael Miller Hatte eigentlich mehr von diesem Buch erwartet, die vielen, geradezu euphorischen Rezensionen auf .com hatten bei mir eine Erwartungshaltung geschürt, dem das Buch leider nicht gerecht wird. Die zugrunde liegende Idee ist interessant, die Charaktere sympathisch und nicht zu flach, jedoch hat das Buch zu viele Längen und das wohl unvermeidliche Happy End doch sehr konstruiert. Zu dem Preis für ein verregnetes Wochenende sicherlich kein Fehlkauf, aber auch kein Buch, was mir länger im Gedächtnis bleiben wird.

Kurzbeschreibung Abreathhtaking near-future thriller. From the NY Times bestselling author whose books have sold over a million copies. When Nick Hall wakes up in a dumpster--bloodied, without a memory, and hearing voices in his head--he knows things are bad. But they're about to get far worse. Because he's being hunted by a team of relentless assassins. Soon Hall discovers that advanced electronics have been implanted in his brain, and he now has two astonishing abilities. He can surf the web using thoughts alone. And he can read minds. But who's responsible? And why is someone so desperate to kill him? As Hall battles for survival and races to find answers, he comes to learn that far more is at stake than just his life. Because his actions can either catapult civilization to new heights--or bring about its total collapse. Based on actual research on thought-controlled web surfing, Mind's Eye is a smart, roller-coaster ride of a thriller. One that raises a number of intriguing possibilities about a future that is just around the corner.
