248 pages of Varangian: The Stone of Babylon in three days and liked it a lot. Of course I expected that Varangian: The Assassins of Teneo Mundus will continue on that level without dropping into the well known second book in a series malaise. The Delivery First thing I noticed was the increased number of pages! The 376 pages of Varangian: The Assassins of Teneo Mundus are divided into a prologue and ten named and consecutively numbered chapters. Unbelievable but true, I read the book in three days! I do not want to repeat the book description which is at the same time a summary of the story. Let us have a look at the two parallel running story lines. On Earth the Anglo-Saxon Edric has to cope with a world which looks quite different compared to the Byzantine Empire he comes from. Fortunately he is not alone. His quest is to find the parts for the key to open a "door" to the supernatural realm of Teneo Mundus, a world where the enemy prepares for the final fight. In order to hinder respectively kill Edric, the assassins of Teneo Mundus are sent to earth. That means the earth story line is head most a travel, hunt and fight story. There is a lot of tough action and it is good to see that Edric even with his supernatural berserkrang need the help from other. Edric is still the character as known from Varangian: The Stone of Babylon. But author Sabine Atkins offers more insight to Edric's inner life - the impact of his dreams, the emotional roller coaster when it comes to relationship with women, emerging doubts and more. It is also good to see that people like Caren, Renata and Kevin are much more than prompters without soul and brain. The relationship between these characters has a direct impact on the story. The fights versus the assassins are impressive and it is not always predictable if all characters will survive or not. Fortunately author Sabine Atkins did not forget that a slight smile from time to time is welcomed. The most impressive development compared to Varangian: The Stone of Babylon is the introduction of the realm of Teneo Mundus with the character of the medieval knight Count Baldwin. I admit that Count Baldwin is my favorite character in Varangian: The Assassins of Teneo Mundus. Baldric, Edric's human antagonist, thrown into a distant world which has not much in common with the world he knows. Sabine Atkins takes time to introduce Baldric and his intellectual world to the reader. It is one of the highlights to see the development of Baldric. A knight with principles and a plain view of the enemy in form of Edric turns into a man who takes a stand against the inhabitants of Teneo Mundus and the evil Henry Delion. At first unintended he supports Edric while protecting other survivors of the Byzantine Empire. A medieval knight with a heart and soul buried deep, deep, deep in the fathom of his intellect. With Count Baldric the story got an impressive counterweight to Edric. I can't wait to see when they will meet the first time on Teneo Mundus. I can assure you that Varangian: The Assassins of Teneo Mundus did not drop into the well known second book in a series malaise. Honestly I have nothing to criticize. Varangian: The Assassins of Teneo Mundus delivered more entertaining pages than expected. Varangian: The Assassins of Teneo Mundus introduced a new main character with a fascinating development. Varangian: The Assassins of Teneo Mundus continues the story on a high level. Varangian: The Assassins of Teneo Mundus prepared everything for the final book in the trilogy. Varangian: The Assassins of Teneo Mundus is an excellent fantasy story full of action and emotion, inner thoughts, two worlds and great character development.
