Mindhunters, Book OneVon Detra FitchSet in Savannah, Georgia. Detective Ryne Robel heads the task force set up to

catch a serial rapist. Ryne asks his commander for another detective to be added to his group. Instead of a detective, Abby Phillips is added. Abby is an expert in forensic profiling. She does not receive a warm welcome to the task force, but Abby's talents prove invaluable. No one has been able to find a link between the victims. They appear to be chosen randomly. The women are being physically assaulted and then tortured. The elusive suspect is learning the victim's phobia and then specifically creating a torture designed upon it. Abby has more going on in her life than the investigation. Her wild sister, Callie, has followed Abby down to Savannah and she is up to her normal tricks. And while the task force follows their slim leads for the suspect's identity, he is watching Ryne and Abby. ***** FIVE STARS! This is the first of a new series revolving around the forensic consults hired from Raiker Forensics. Reading this story is a lot like watching CSI on television, but this story also includes a sizzling romance and creepy suspense. Readers will not have to wait long for the next episode. The first three titles will be printed one month apart. I do not know if this will stop as a trilogy or if it will continue on into the next year, but either way the author has a winner on her hands. This story is very realistic with close attention to the details and methods used by the brave people who actually investigate such horrors. (They have my undying respect and admiration!) A fabulous story that I cannot recommend highly enough. *****Reviewed by Detra Fitch of Huntress Reviews.

KurzbeschreibungWith a serial rapist loose on the streets of Savannah, hotshot detective Ryne Robel needs answers, not the psycho-babble head games of forensic profile Abbie Phillips.
